RE: State Universities Civil Service System Audit Schedule for 2025—2027

The updated audit schedule for 2025 through 2027 is attached for your reference.

The University System will confirm specific audit engagement dates with each place of employment as the University System audit team progresses through the schedule.

Similarly, the University System will specifically identify audit timeframes with each place of employment at the beginning of each audit engagement. As we have previously indicated, this audit schedule anticipates that the timeframe for each audit will encompass a three-year period beginning approximately 42 months prior to the beginning of the audit engagement.
