Series Narrative

Employees in this series perform duties involving the providing, supervising, and directing of medical social services.

DESCRIPTIONS OF LEVELS OF WORK

Level I: Medical Social Assistant **0264**

Employees at this level receive training in medical social case activities and perform tasks needed to develop some competence in these activities. They work under direct supervision.

A Medical Social Assistant typically -

1. assists the Medical Social Associate in interviewing patients in the clinic and during other phases of care to help identify social and emotional needs.
2. assists in determining resources for meeting social and environmental needs.
3. provides case work services relating to non-complex problems.
4. assists in preparation of patients and families for referral to other resources and prepares referral material.
5. records activities and makes reports as required.
6. performs other related duties as assigned.

Level II: Medical Social Associate **4260**

Employees at this level plan and coordinate various segments of healthcare services and conduct care coordination activities for clients and families. Employees are responsible for consultation with other members of the care coordination team regarding areas of social and emotional issues/problems, and for overall care coordination activities in an assigned geographic area. They work under administrative supervision from a designated supervisor.

A Medical Social Associate typically –

1. determines client eligibility for services.
2. interviews clients and/or families regarding plans for care, which may include home visits and coordinates the specific medical and rehabilitative services recommended.
3. counsels families on the client's service needs and provides such guidance as necessary.
4. initiates or recommends referral services to other agencies in meeting family needs.
5. develops and coordinates service plans which may include collaboration among agencies to recruit and organize a network of integrated services.
6. maintains current case records and prepares reports as required.
7. collects and maintains current information about available community resources.
8. arranges and participates in interdisciplinary case conferences.
9. explains university/agency services and programs to the community, and/or delivers educational presentations and materials to community organizations.
10. communicates unmet client needs to responsible parties for appropriate action.
11. organizes and facilitates clinics; participates in interagency collaboration initiatives.
12. acts as liaison between families and providers to facilitate communication.
13. advocates for family and clients' rights.
14. performs work related to the lower level in this series.
15. performs other related duties as assigned.

Level III: Medical Social Consultant

0876

Employees at this level develop and organize various aspects of social work. They work under general supervision.

A Medical Social Consultant typically –

1. identifies and modifies social and environmental problems.
2. interviews patients and families in clinics, in a medical or social service agency and during other phases of care for the purpose of helping meet social and emotional needs influencing effective use of medical care.
3. performs psychosocial assessments.

4. performs individual therapeutic interventions including individual, group, couples and families therapies.
5. differentiates and integrates social work services on a collaborative relationship with other staff/treatment team members.
6. determines available resources for meeting social and emotional needs.
7. gives consultation on programs offered and provides social work consultation on the related social needs of the individuals.
8. participates in plans for cooperation with local health, welfare, and community agencies for more effective services to the total patient group.
9. collaborates in studies and surveys related to patients' needs.
10. participates in orientation courses, staff development programs, and student training of other personnel or other agencies.
11. records social work activities and makes reports as required.
12. coordinates medical social services within a major area i.e. nursing, speech, hearing services, etc.
13. provides consultation to, coordinates, reviews and participates in evaluation of work of the Medical Social Associate; provides direct supervision for the Medical Social Associate.
14. performs work related to the lower level in this series.
15. performs other related duties as assigned.

Level IV: Assistant Supervisor of Medical Social Services**3730**

Employees at this level assist in administering and coordinating social services for a unit. They work under administrative supervision.

An Assistant Supervisor of Medical Social Services typically -

1. coordinates medical social services within a major area i.e. nursing, speech, hearing services, etc.
2. provides consultation to, coordinates, reviews and participates in evaluation of work of the Medical Social Consultant; provides direct supervision for the Medical Social Consultants.
3. assists in the formulation and implementation of policies and procedures for medical social personnel.
4. assists in the development and carrying-out of in-service training and other educational programs to increase effectiveness of medical social staff.
5. provides administrative assistance to and substitutes for the Supervisor of Medical Social Services.

6. may function as a Medical Social Consultant as necessary.
7. performs work related to the lower levels in this series.
8. performs other related duties as assigned.

Level V: Supervisor of Medical Social Services**3729**

Employees at this level assist and are responsible for planning and directing the social work aspects of a unit. They work under administrative supervision.

A Supervisor of Medical Social Services typically -

1. plans the development of social work services and established policies and procedures for social work activities.
2. participates in program planning and development of agency policy.
3. provides supervision to medical social work staff; assists in recruitment and assignment of staff.
4. formulates standards for medical social work positions; assists in recruitment and assignment of staff.
5. consults with other professional and administrative personnel regarding social and emotional factors influencing effective care.
6. participates in setting standards relative to social aspects in facilities used by the unit.
7. participates in the promotion of cooperative relationships with health, welfare, educational, and rehabilitation agencies and gives leadership in the development of working arrangements with social agencies for more effective and better integrated services.
8. participates in educational activities (such as in-service training, orientation courses, staff development programs, and training projects).
9. collaborates in studies and surveys related to patients' needs and assists in evaluation of services, with particular reference to social services.
10. participates in community planning for essential services to meet social, emotional, and health needs of disabled persons.
11. represents the agency as requested.
12. records social service activities and prepares reports as required.
13. performs work related to the lower level in this series.
14. performs other related duties as assigned.
